

JABULANE MASHININI

Software Developer • Database Enthusiast • Final-Year IT Student

South Africa | +27 81 458 0986 | jabulanemashinini686@gmail.com | github.com/JabulaneMash-glitch | linkedin.com/in/jabulane-mashinini

PROFILE

Final-year BSc Information Technology student at North-West University (Vaal Triangle Campus) with a strong foundation in software engineering, database design, and systems development. Hands-on experience across C#/.NET Web Forms, Java, SQL Server, and Cisco networking, gained by independently designing, building, and documenting six complete academic and personal projects — from database-backed web applications to a custom data-structures library and an enterprise network design. Seeking a graduate software developer or IT role.

EXPERIENCE

Statistics Tutor — North-West University

Current

- Provide academic support to university students in Statistics through one-on-one and group tutoring sessions.
- Help students understand statistical concepts, improve problem-solving skills, and prepare for assessments.
- Strengthen communication and leadership abilities by guiding peers through complex material.

PROJECTS

ShedWise (C#, ASP.NET Web Forms) — [GitHub](#)

- Built a load shedding schedule lookup app for Potchefstroom residents, letting users select their municipal zone and view outage windows for any given day.
- Implemented cookie- and session-based state management to persist user details and zone selection across pages.
- Designed an interactive calendar-driven results page with day-of-week outage logic per zone.

SquadUp (C#, SQL Server) — [GitHub](#)

- Developed a sports team registration system for NWU students, with registrations persisted to a SQL Server database via parameterised ADO.NET queries.
- Built a live registrations dashboard using a data-bound GridView, plus a deregistration workflow by student number.
- Validated user input (dates, required fields) using ASP.NET server-side validation controls.

Enterprise Network Design (Cisco Packet Tracer, RIP) — [GitHub](#)

- Group project — served as Remote Access & Security Specialist, designing authenticated, segmented remote-access provisions for hybrid workers.
- Contributed to a hybrid ring-star network topology for a multi-zone office building, with RIP routing and per-zone subnetting across 7 functional areas.
- Helped produce full technical documentation covering topology rationale, IP addressing scheme, security zoning, and project budget.

LetterLock (Java) — [GitHub](#)

- Built a Hangman-style word-guessing game underpinned by a hand-implemented generic array list, rather than relying on Java's built-in ArrayList.
- Implemented a Fisher-Yates shuffle, letter/word verification logic, and a hint system, validated through a custom self-test routine.

CallFlow (Java, Data Structures) — [GitHub](#)

- Designed a call centre queue management system built entirely on custom-implemented linked list, queue, and stack data structures.
- Implemented FIFO call queuing, LIFO resolved-call history, and an undo-last-call feature, demonstrating strong grasp of data structure fundamentals.

Personal Portfolio Website (HTML, CSS, JavaScript) — [Live Site](#)

- Designed and built a futuristic, cyberpunk-themed portfolio site featuring a custom particle-network animation, dark/light and accent theming, and an interactive HUD-style interface.
- Implemented responsive layouts and accessible focus states across all sections, including a live projects showcase linking to GitHub repositories.

SKILLS

Programming: Java, C#, JavaScript, HTML5, CSS3, SQL

Database: SQL Server, Relational Design, ER Diagrams, Normalization

Software Development: OOP, Data Structures & Algorithms, Software Engineering, REST APIs, CRUD Applications

Networking & Security: Cisco Packet Tracer, Network Topology Design, Basic Networking, Ethical Hacking Fundamentals, Cloud Security Fundamentals

Tools: Visual Studio, VS Code, Git & GitHub, Microsoft Office

EDUCATION

North-West University, Vaal Triangle Campus

Bachelor of Science — Information Technology | Final-Year Student

CERTIFICATIONS

- Introduction to Cisco Packet Tracer — Cisco Networking Academy (2026)
- Ethical Hacking 101 — Simplilearn (2025)
- Introduction to Cloud Security — Simplilearn (2025)

INTERESTS

Pool, Volleyball, Software Development, Cybersecurity, Database Systems
